

DATAINTRO SOFTWARE

ULTRAFORMS® TECHNOLOGY

WEB DEMO FORM

Although UltraForms® Technology works on-line as well as off-line, this demo form will ONLY work online. The provided symbol can hold up to 250 characters.

1

FILL THE FORM

Go

You can fill the fields on the right by hand, or you can press the "Go" button above, to populate them automatically with fictitious data.

Feel free to edit them once filled.

2

GENERATE THE BARCODE

Go

See how a dynamic 2D Barcode is generated in real time, containing all the form's data.

3

PRINT THE FORM

Go

Clic "Go" to Print the form.

The UltraForms® Advantage

UltraForms® Technology is a software product that allows Adobe® PDF Fillable Forms to generate dynamic 2D barcodes based on user data input.

This allows for fast, inexpensive and error free data capture, once the form is printed. The 2D barcode contains all of the form's data, and also can embed control characters when needed to ease integration with back-end systems. Data is easily recovered with 100% guaranteed accuracy, by scanning the 2D barcode.

UltraForms® Technology is invisible to the end-user. The only software needed is Adobe Acrobat® Reader (v4.05 and up).

UltraForms® Technology Features:

- No need for Adobe® Acrobat plug-ins
- No need for external libraries or fonts.
- One file alone works in all platforms (Mac, PC, Unix).
- Accepts all languages.
- Handles all export data formats: XML, CSV, Tab, Custom...
- Works on-line (web) as well as off-line (CD, eMail).
- Real time updatable (Risk FREE technology)

Micro Case Study

MISSOURI DoR CUTS DATA CAPTURE COSTS BY 67%

Organization:

State of Missouri Department of Revenue (DoR)

Challenge:

Reduce average cost "per return produced" by eliminating Forms Data Capture costs.

Solution:

UltraForms® Technology embedded in PDF Fillable Tax Forms allows citizens to generate dynamic 2D Barcodes based on user data input. In this stage, UltraForms® Technology was implemented in 7 different forms (5 short + 2 long).

Results:

After two months of impressive performance in an uncontrolled environment (taxpayer home computers & printers), Forms Data Capture times have improved by 15x (without errors) allowing for the reduction of overall processing costs by 67%.

Expected cost savings in the first year & ROI:

- Close to US \$100,000
- 100% ROI in less than 4 months.
